A MERICAN CROWN WINDOW GLASS—
manufactured in the village of Redford, county
of Clinton, and State of New York.

To the Redford Crown Glass has been awarded
the first Premium of the American Institute in the
city of New York for five successive years, and has
received a gold medal in commendation of its superior merits.

This Glass is made from white flint sand, obtained
in the vicinity of the works, and is the only Crown
Glass made from that species of sand. It is capable
of standing every change of climate, nor will it lose
its lustre by age.

The Redford and Saranac Crown Window Glass
are distinguished from ordinary Glass by the uncommon evenness and beauty of surface, the superior
transpareacy and lightness of color, the great thickness, and the general excellence of the materials
which compose them. The surface not being polished after being blown, retains the enamel, brilliancy,
and hardness, and is not subject to the objection so
often applied to Plate Glass, of being easily defaced
and permunently bedimmed by dust; being made of
extra thickness, will, without injury, withstand violent winds, haif storms, jars of cannon, &c. Its use,
in the end, will prove more economical, independent
of its adding so much to the beautiful appearance of
buildings.

Specimens of this deservedly popular Glass may be

of its adding so much to the beautiful appearance of buildings.

Specimens of this deservedly popular Glass may be seen in the New York Exchange and Custom House, Howard's Hotel, Bronson's Buildings, Broadway, Centre Market, and a great many private residences and stores in various parts of the city; also, in the Exchange and Custom House, Boston; Girard Colege, Philadelphia; Exchange Hotel, Baltimore; in the public buildings at Washington city; the Capitol at Raleigh, North Carolina, and in many both public and private edifices throughout the United States. It has been used in a great number of steamboats and railroad care, and given entire satisfoction. It is be ieved that the above will suffice to prove that this Glass stands pre-eminent, and that it deservedly merits the approbation of builders and consumers of Glass.

The Saranac Crown Glass is most used in stores and buildings of the second order, green houses, &c.

consumers of Glass.

The Saranac Crown Glass is most used in stores and buildings of the second order, green houses, &c. where strength and clearness are particularly desired, and will range shout 334 per cent. cheaper than Redford. The double thickness is always used for lighthouses, and is taken by the true economist for sky fights, steamboats, ships cabin windows, furnished to any pattern or size. The Glass is carefully packed in stout boxes, nailed, and secured so as to be transperted with safety to any part of the United States.

For the more complete satisfaction of persons at a distance, who may not have an apportenity to examine this beautiful article, the following testimonials are respectfully offered for consideration.

Extract from the report of the committee of the American In-titute, October, 1837:

"For richness of lustre and brilliance of surface, as well as thickness and strength, the Reacord Glass is the most beautiful article of the kind that has ever failen under our notice, either of domestic or foreign production; and it affords a proud specimen of the skill and enterprise of American manufactures."

The following gentlemen, Architects, have permitted us to use their names in commendation of the above Glass:
